OUR VAUES

Over the ages the dentist-patient relationship has been defined through rules of ethics and law as a relationship founded in trust. When a patient seeks a dentist's help and the dentist agrees to give that help, a special relationship is created. The dentist agrees to honor that trust, and to become an advocate in all matters related to the patients' dental treatment.

PrimeCare Dental understands and honors the importance of the dentist-patient relationship as being vital to the delivery of the high quality dental treatment in the most affordable setting possible. PrimeCare Dental prides itself in understanding the importance of a strong trusting relationship between the dentist and patient.

OUR MISSION

PrimeCare's mission is to have the dentist meet and exceed our member's expectations. Members, employers, and insurance agents take comfort in knowing that their dental benefits are being serviced by dental benefit professionals specializing in the delivery and administration of dental benefit programs. Our team of dental professionals work side by side with our dentists, employers and members to ensure the highest quality of service is delivered each and every time.

A strong commitment to service, integrity, and sound administrative practices has allowed PrimeCare to provide an array of dental products that benefit all our members and positions PrimeCare as a great dental benefits option.

WHY CHOOSE PRIMECARE DENTAL PLAN?

WHO WE ARE ?

PrimeCare Dental Plan is a Knox-Keene licensed dental plan operating within 42 counties in the State of California. Our mission is to help people live longer, healthier lives, by supplying affordable dental care from trustworthy dental professionals that share common values. PrimeCare has developed dental plans with our members in mind, offering useful benefits with deep savings. Our dental benefit programs are available to individuals, employers, seniors, and other consumers throughout California, and include savings on more than 300 contracted dental procedures. PrimeCare Dental fills the needs of multiple market segments by offering dental benefit programs with lower premiums and higher benefit levels than our competitors within a tightly managed network of more than 3,700 contracted general and specialty dentists.

QUALITY ASURANCE

Through the Quality Assurance Committee, PrimeCare continually evaluates and monitors the standard of care delivered to its enrollees in a manner consistent with both its obligations as a Knox-Keene licensee and its business objective of ensuring high-quality dental care for its enrollees. PrimeCare's Dental Director, a licensed dentist, directly supervises the administration of its quality management program. In establishing a large network of competent dentists in convenient and strategic locations, PrimeCare engages in an active recruitment program that includes a screening of applications for network membership, personal visits to potential dentists, reference checks with state licensing authorities, validation of malpractice coverage, and initial certification.

The Plan also engages in an ongoing monitoring of its dentists through periodic on-site visits by its Dental Director. The Plan maintains administrative systems to record, monitor, investigate, and promptly resolve all enrollee complaints regarding the dental services.
